

## Purpose:

This register is maintained and made publicly available in accordance with clause 4.2.4(b) of the Australian Energy Regulator (AER) Ring-fencing Guideline Electricity Distribution.

The table below sets out those employees who hold positions in Essential Energy's Distribution Network Service Provider (DNSP) business who, from time to time, are shared with Essential Energy's Related Electricity Service Provider (RESP). These positions have been assessed against the criteria set out in clause 4.2.4(b) of the Guideline and are considered to meet one or more of the exceptions from the obligation not to share employees between the DNSP and the RESP.

This register includes all shared employee roles that are involved in both the provision of marketing of direct control services and contestable electricity services, except those that perform services that are not electricity services and only have access to electricity information to the extent necessary to perform those services (such as general administration, accounting, payroll, human resources, legal or regulatory, or information technology support services).
